

Product Code: 7959

Sector: Motorsport

Issue No: 2

Issue Date: 01/01/22

## MOTORSPORT CTV MINI 20w50

Competition semi synthetic NANODRIVE transverse engine oil

### Application

Specifically formulated for competition Minis and any application where the engine and gearbox share a common oil. Especially suitable where a limited slip differential is used. Also suitable for all gearboxes that specify a 20w50 engine oil.

### Typical Characteristics

Density @ 15°C, g/ml	0.889
Kinematic Viscosity @ 100°C, cSt	18.0
Flashpoint °C	>220

### Technical & Health and Safety

### What is NANODRIVE?

NANODRIVE is the award-winning Millers Oils motorsport brand that incorporates advanced nanoparticle technology for high performance applications, where stress on components is at its limit.

### How does it work?

In engine and gear oils, NANODRIVE technology combines advanced nanoparticles with synthetic technology to greatly reduce friction, protect against wear and maximise power.

### Features and Benefits

- The unique engine and gear oil uses a semi-synthetic base fluid formulation and special additive system to provide maximum engine protection along with transmission performance to API GL-4 level, the normal performance level demanded for gearboxes.
- Suitable for conventional engines that have heavily loaded skew gears, often due to running high oil pressure.
- Specially designed for classic mini engines and is compatible with older seal types and technology which maintains oil pressure and reduces oil consumption.
- Our latest additive package technology incorporates high levels of ZDDP\* additive for optimum wear protection.

Footnotes: \*ZDDP – Zinc Dithiophosphate anti-wear additive
