

Multi Parts Cleaner/ Brake Cleaner

Bardahl Multi Parts Cleaner quickly and effectively removes brake fluid, grease, oil, tar, and other contaminants. As a universal cleaner, the product is used to clean electrical and clutch parts. This cleaner evaporates in a short time and leaves no residue. It dissolves the most stubborn, even waxed, dirt. It displaces moisture and dries quickly.

Bardahl Multi Parts Cleaner is used for brake lining, piping, brake drums, brake cylinders, spring brake discs and pads, clutch, transmission, gearbox, and all other metal parts and tools. It can be applied without disassembly of the brake units. This product extends the life of the brakes, ensures a shorter braking distance, and reduces noise.

Bardahl Multi Parts Cleaner can also be used for removing preservatives. The specially matched raw materials ensure that this cleaner has an excellent penetration and cleaning capacity.

Manual

Spray the parts generously and let them work for some time. Dry with compressed air or a soft cloth. In case of substantial contamination, repeat the treatment. The can is filled with environmentally friendly gas.
