

# Silicone Spray Lube

*Stops beeping sounds - lubricates - protects - displaces moisture.*

**Bardahl Silicone Spray Lube** is an anti-friction agent for all kinds of applications: cars, homes, or offices. It lubricates plastic, rubber, metal, and other sliding surfaces.

It cannot be washed away, melted away, or frozen. It dries quickly, does not stick, and does not stain.

**Bardahl Silicone Spray Lube** slows down rust formation and saltwater corrosion. The clean, smooth lubricating film does not stain and allows everything to slide more easily.

The high quality of the silicone plus its special penetrating effect make this product an ideal lubricant and protection agent for all rotating and sliding parts. It does not attract dirt, sand, dust, and water.

## Applications

---

- **Lubricates** car locks, hinges, windows, door rubbers, draft strips, cables, etc.
- **Displaces moisture:** ignition, distributor cap, alternator, starter motor, etc., of cars and trucks, and boats.
- **Protects** chrome, copper, aluminum, plastic, wood, rubber, vinyl, leather, and all objects such as sports equipment (diving equipment, fitness items), garden tools, plastic chairs, and side surfaces of tires. It stops beeping sounds caused by frictunder-car car dashboards.

**Rubber maintenance:** **Bardahl Silicone Spray Lube** keeps rubber parts supple and smooth. It protects against drying out and is sticky at low temperatures. Rubber parts and especially the rubber seals of cars and trucks become fragile, sticky, or shrink over time due to aging or strongly varying temperature influences.

To extend the life of these components, it is wise to treat them with **Bardahl Silicone Spray Lube**, preferably from the beginning. It prevents problems with frozen rubber seals of car doors and trunk lids. Therefore, before winter begins, spray the rubbers of your car well. This way, the rubber does not freeze. It does not freeze and withstands temperatures up to  $\pm 40^{\circ}\text{C}$  to  $200^{\circ}\text{C}$ .

## Manual

---

Apply the product to a clean and dry surface.
