

DINITROL® 4941 / Car

Black Solvent Based Underbody Coating

Dinitrol 4941 / Car is a black underbody chassis coating that contains self healing properties to recover any small damaged areas within the coating layer.

Once Dinitrol 4941 / Car treatment is applied to the underbody chassis area it seals and protects the surface from rust accelerating water and oxygen.

The black coloured DINITROL 4941 / Car coating provides a robust universal film coating of the vehicle underbody and is also very effective at protecting high impact areas including wheel arches

When applied to a clean, dry surface, it adheres to both painted surfaces and those coated with a layer of PVC or similar material. Zinc, rubber and plastics are completely unharmed by the product.

DINITROL 4941 / Car is also designed for use on spare parts, machines and iron and steel structures in highly corrosive environments.

Available Sizes:- 500ml Aerosol / 1ltr Can / 5ltr Can / 20ltr Pail / 60ltr Drum / 208ltr Drum
